PROFILE

I'm Soloviov Ivan a programmer without commercial experience, but with a great technical outlook. I write mostly in C# I often use ASP.Net Core to create web applications (watch my github) for this I use MySQL and a EntityFramework. I was one of the founders of the company SavePC - repair and maintenance of computer systems. Then worked in a small company Helper where he was a system administrator.

💡 You can find complete information about me on my site. Also there I often publish my articles, I will be glad to see you there! www.soloviov.fun

EXPERIENCE

- 2021
MY WEBSITE
ASP.NET CORE MVC
This is my home project where I developed a site with an admin panel and dynamic pages. It was designed to create a personal website. It was also deployed on Google Cloud, but unfortunately I ran out of free server usage 😞. My site is currently running on Jekyll.
- 2021
WEB CALCULATOR
ASP.NET CORE
The project is designed for learning purposes. The "Strategy" pattern was used in the development.
- 2021
CONSOLE GAME
C#
Just a console mini game 👍
